

3 - DEGREE WEDGE PADS

Important - read before using

- **The 3 - Degree Wedge Pad** is made of soft rubber and designed to lift the rear of the back hooves in the Scoots to improve fit and comfort.
- They will provide relief to horses suffering from issues such as caudal heel pain due to under-run heel.
- Some horses, depending upon how they are trimmed and the condition of their hooves, may only get a few weeks wear.
- The wedge is not designed for long term use. With correct, regular trimming the horse will become sound, the heels will correct themselves and the horse will no longer need to use wedges.
- Using wedge pads may affect the fit of the boots and you may need to go up a size to accommodate pads.
